

Your New Source For Healthcare Consulting

Mission

Exaltant exists to help you succeed in improving the business performance of your healthcare organization.

Value Proposition

Our leadership can spend more time with clients delivering smaller, more effective engagements that produce higher value, but that don't fit into the large consulting corporation business model. This provides Exaltant a way to deliver increased quality, while lowering the cost of consulting services to our clients.

Our Services

Exaltant provides over twenty years of healthcare consulting experience to help analyze business issues, build strategies, design tactical plans and implement successful initiatives in the following areas:

Strategy

We offer two strategy solutions aimed at increasing market share in an environment driven by healthcare reform, a stagnant economy and increased consumerism. These solutions utilize many of our other service areas to deploy comprehensive business performance improvement.

Business Operations

Exaltant delivers solutions targeted at improving efficiency, effectiveness and policy compliance in a variety of business operations areas. These areas include the processes within the revenue cycle, procure to pay, internal and external reporting and clinical departments.

Financial Analysis

Our financial analysis solutions include market share analysis, cost accounting, service line profitability analysis, financial planning, budgeting, decision support, pricing and charge master reviews. All of our Financial Analysis solutions are directed toward enhancing or measuring the profitability of our clients.

Regulatory Compliance

Exaltant develops initial compliance programs, reviews existing compliance programs and performs auditing, monitoring and compliance issue investigations. We advise clients on a variety of billing and reimbursement compliance issues, perform charge master reviews and also consult on Medicare and Medicaid cost reports.

Project Management

Our executive leadership provides a wealth of experience planning and leading large cross functional and multi-organization teams in change management and business process and system redesign and implementation.

Interim Management

Exaltant offers interim management professionals at a reasonable price to assist clients on a temporary basis. Through our large network of professionals, we can assist you in virtually any position that traditionally reports up through the Chief Financial Officer, Chief Audit Executive or Chief Compliance Officer.
